

Please do not take away our Indiana State Law which has limited the telephone solicitation calls into my home. I have never commented on any law before now. This law has improved my home life (and sleep) remarkably. I believe these calls are as intrusive to my home as a knock on the door at night. Before our Indiana law was effective I received 5 to 6 calls every night. My 94 year old neighbor (without an answering machine or caller ID) was often greatly disturbed by either missing the call or endangering her health by trying to hurry to reach the phone. These calls are an invasion and should be stopped! Please don't mess with our state law.
